

A rooftop lounge area at night. The space features several large, rectangular wooden planters with black cushions and white pillows. The planters are arranged in a row, creating a sense of depth. The floor is made of light-colored wood. In the background, a city skyline is visible through a glass railing. The sky is dark, and a full moon is visible in the upper right corner. The overall atmosphere is modern and sophisticated.

exterpark

Stimulation of the *senses* in so many different ways...

... to look at it, **to touch it**,
to walk on it... feel it, *live it*, **enjoy it**.

Whether it will be a complete re-landscaping...

...or evolving from the existing,

Exterpark has enormous **potential** to materialize any aspiration with the goal
to ***create an environment that never ceases to excite your senses.***

exterpark

The origin and evolution of contemporary outdoor flooring

Exterpark embraces wood as it is:

one of the warmest natural materials
with unique and incomparable features
of ***texture***, colour, shades, **patterns** and *grain*.

NATURE PERFECTED:

beauty and functionality come together
to create spaces which are a statement of *pure exclusivity*.

The warmth of excellently manufactured wood on bare feet is an exceptional feeling.
Smooth surfaces, bevelled edges and **no gaps** create an unrivalled visual effect which make

Exterpark the ***definite option for outdoor spaces.***

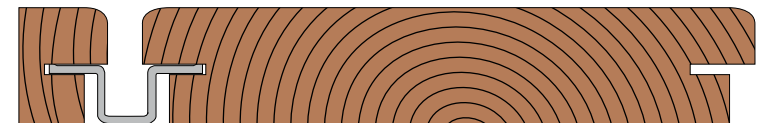

EXTERPARK REVOLUTION

-exterpark
CLASSIC

THE **ORIGINAL** HIDDEN FASTENING SYSTEM

EXTERPARK FIRST REVOLUTION IN 1995: **GOOD** *bye screws!*

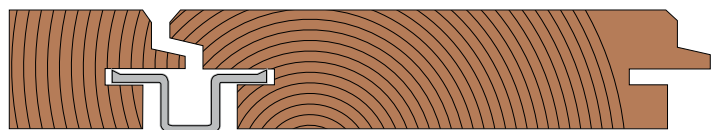

- **Providing a brand New look:** Exterpark was the **first producer** to wave bye the old fashioned looking screws on the surface.
- **Hidden fastening system:** all fixing is done by means of an omega-shaped stainless steel clip.
- **Longer lifespan:** all boards are manufactured with a double groove profile and don't need to be drilled.
- **A safer and smooth uniform surface:** which remains untouched, minimizing the risk of splinter and fissure forming.
- **Optimum drainage:** 4mm gap between boards is the optimum space for wood to expand and contract and allow enough expanse for water drainage.
- **Better stability:** wood must not be trapped with screws. Exterpark only works with suitable woods for outdoors which will have light contractions and expansions. Such movements are absorbed by clips and extra holding is provided by tongue and groove at short ends.
- **Extra stability** is provided by slow oven drying of raw materials.
- **Barefoot walk is encouraged:** rounded edges and fine manufacturing allow for a pleasant and comfortable contact with wood.

As any other structural component, outdoor flooring needs to be backed with a suitable system.
In 1995 we launched the very first worldwide hidden fastening system together with a complete installation concept.
A new paradigm for exterior covering solutions had been created and any other similar system found inspiration in ours.
Exterpark broke up walls and opened spaces seeking for same comfort outdoors as we do have indoors.

EXTERPARK SECOND REVOLUTION IN 2004: *THE PLUS INVISIBLE SYSTEM*

**PATENTED
PROFILE**

THE ULTIMATE EVOLUTION OF OUTDOOR FLOOR

- The Plus profile **hides the structure underneath** featuring a more elegant look.
- **Easier cleaning and maintenance:** dirt and objects do not go down underfloor.
- **Safer:** heels do not get stuck and small objects such as coins or rings are no longer lost.
- Slick look enhanced by the **1,5 mm bevelled edges**.
- Differentiation: **exclusive patented system**.

The first exterior wooden floor
with the **looks and comfort of an indoor hardwood floor**

-exterpark
Plus

Manufactured in Spain with pride since **1992**.

re

Endure patented wood treatment is the only one that **transforms sustainable softwoods**, like Carolina and Scots Pine, into **hard, stable and durable woods**, like tropical species.

The treatment consists of a high temperature impregnation of biodegradable substances, like for instance sugar cane, which solidify inside the wood and change permanently its cellular structure.

Acknowledged as one of the 50 products which could change the world

CRAFTSMANSHIP MEETS DESIGN

Nature inspires Exterpark to **create the remarkable**.

Exterpark is passionate about creating a luxurious living environment presenting a complete range of decorative elements such as **pergolas, lattices and planters**.

Abundance of **high quality natural materials**, creating a harmonious atmosphere that looks beautiful and *makes you feel good*.
